

WITH STARCUBE YOU ARE SAFE

A device has been inserted inside this room to guarantee the sanitization of the air.

Its name is **Starcube by Jonix** and it is a tool capable of **destroying 99.9% of bacteria and viruses from the air and from all surfaces.**

Unlike any other treatment, it acts continuously and constantly, managing to guarantee the safety you need for the entire duration of your stay.

Its operation produces a slight mechanical sizzle sound, while performing its important function for your wellness and your health. If the sound may annoy you, **you can turn off the device when you want**, but we recommend leaving it on all the time, to benefit from it during your sleep.
